Techie BABY

Choose ONE Tech Role

Even if I have no idea at all what they mean, I'll just pick ONE role that appeals to me from the job title itself

- ❏ Cloud-based I.T. manager
- ❏ Motion graphic designer
- ❏ Creative instructional designer
- ❏ Growth Hacker
- ❏ Front-end web developer
- ❏ JavaScript developer
- ❏ AI and machine learning enthusiast
- ❏ Data architects and engineer
- ❏ Data scientist
- ❏ UX/UI designer
- ❏ Inbound growth marketer
- ❏ Technically savvy QA specialist
- ❏ Special web and tactics developer
- ❏ HTML5 web developer
- ❏ Visual data scientist

Research ONE Tech Role

Start with the chosen job title in searching engine: Google, Wikipedia, etc., and read as much as I can to develop the understanding with its job nature. As I do this, note down additional words that keep arising that I can use to develop my knowledge further. Then, repeat the whole process with these keywords. Along the way, jot down the terminologies which I don't understand.

Terminologies - e.g. javaScript, back-end development, data-mining, Machine learning, etc.

Interesting knowledge - e.g. why does an engineer need a rubber duck for debugging? Watch this video - rubber duck debugging - if you wanna know the answer now.

Research Multiple Tech Roles

Accept the fact I don't know what the "real" tech job market looks like. Figure out the different tech roles that hold similar job nature and the terminologies appear the most. Take them as a pattern I shouldn't neglect. Note them all down.

Different tech roles that hold a similar job nature - e.g. software engineer, analyst programmer, front-end web developer, etc.

The terms come up so often as a pattern that I notice - HTML5, SEO, W3C, AJAX, client-side framework, etc

Consult Techies

Accept the fact I'm a techie-wannabe who doesn't have much techie connections. Start with LinkedIn, use the job titles to search them. Use the No-fluff Email Template provided to reach them out. And ask my list of question.

	Name	Tech Role	Coffee meetup	Phone call	Email
e.g.	King	Lead developer	/	6 Jun @4.00pm	/
